## EDUCATION

### GEORGIA INSTITUTE OF TECHNOLOGY

Ph.D., Transportation Systems Engineering May 2014  
Advisor: Laurie A. Garrow  
Dissertation: “Using Big Data to Model Travel Behavior: Applications to Vehicle Ownership and Willingness-to-Pay for Transit Accessibility”  
M.S., Economics

### BRIGHAM YOUNG UNIVERSITY

B.S. with University Honors, Civil Engineering December 2009  
Minor degrees in Mathematics and Asian Studies

---

## PROFESSIONAL EXPERIENCE

### BRIGHAM YOUNG UNIVERSITY

*Assistant Professor* November 2018 -  
Researching the application of passive data sets in transport and land use modeling, including spatial and social effects on travel behavior.

### TRANSPORT FOUNDRY Atlanta, Georgia

*Transportation Engineer* April 2017 — October 2018  
Developed a data-driven travel demand model from passive data sources.

### WSP | PARSONS BRINCKERHOFF Raleigh, North Carolina

*Technical Principal, Systems Analysis Group* June 2014 — April 2017  
Developed advanced travel demand models for public sector clients.

### UNIVERSITY OF NORTH CAROLINA, CHAPEL HILL

*Adjunct Lecturer/Teaching Assistant* January 2017 - May 2017  
Lectured on transportation data, discrete choice econometrics, and mode choice models in the graduate travel demand analysis course.

### GEORGIA INSTITUTE OF TECHNOLOGY

*Post-doctoral Researcher* January 2014 - May 2014  
Developed a curriculum to teach sustainable transportation engineering and analysis, in partnership with the National Center for Sustainable Transportation.

### UTAH TRANSIT AUTHORITY Salt Lake City, Utah

*Strategic Planning Intern* May 2009 - June 2010  
Developed transit operating scenarios for the Wasatch Front long-range transportation plan and for UTA’s internal scenario planning and programming purposes.

### HALES ENGINEERING Lehi, Utah

*Engineering Intern* July 2008 - May 2009  
Prepared traffic impact analyses for commercial and residential developments.

RESEARCH  
INTERESTS

Transportation planning and engineering, travel demand modeling, application of passive data products in transportation planning and forecasting.

REFEREED  
JOURNAL  
ARTICLES

First author or first faculty author on 6 of 13 total journal articles. <sup>†</sup>indicates BYU graduate student authors, \*indicates BYU undergraduate authors. Paper 1 came from my undergraduate work, papers 2 through 6 were from my doctoral research, and papers 7 through 13 represent work completed during my time on the faculty at BYU. Number of citations are from Google Scholar as of December 2021.

#### VENUE NOTES

*Transportation Research Part A: Policy and Practice* is a leading international journal with robust peer review focusing on transportation policy analysis and the planning of transportation systems. CiteScore: 8.5; 17/318 in civil engineering. Impact factor: 5.594. Publisher: Elsevier.

*Environment and Planning B: Urban Analytics and City Science* is a leading international journal with robust peer review publishing cutting-edge research in analytical methods for urban planning and design. CiteScore 4.6; 6/138 in architecture. 5-year impact factor: 3.889. Publisher: Sage.

*Transportation Research Part C: Emerging Technologies* is a leading international journal with robust peer review focusing on applications and implications of technology in transportation systems. CiteScore: 14.0; 3/318 in civil engineering. 5-year impact factor: 8.089. Publisher: Elsevier.

*Findings* is an interdisciplinary, independent, community-led, peer-reviewed, open access journal focused on short, clear, and pointed research results. The journal was established in 2019. Publisher: University of Sydney and McGill University.

*International Journal of Environmental Research and Public Health* is an interdisciplinary, peer-reviewed, open access journal. CiteScore: 3.4; 179/526 in public health. 5-year impact factor: 2.789. Publisher: MDPI.

*Smart Cities* is an international, scientific, peer-reviewed, open access journal on the science and technology of smart cities. This journal was established in 2019. Publisher: MDPI.

#### PEER- REVIEWED CONFERENCE PAPERS

All listed conference publications are full papers and include at least a single-blind review process with multiple expert reviewers for consideration. Papers 1 and 2 resulted from my undergraduate honors thesis, papers 3 through 5 resulted from my doctoral work, and items 6 through 8 represent work completed since joining the faculty at BYU.

---

EXTERNAL  
FUNDING

As Principal Investigator, totalling \$305,000:

- 6 **Macfarlane, G.S.** & Schultz, G.G. 2021. *Optimizing Traffic Incident Management Deployment in Utah*. \$70,000, Utah Department of Transportation.
- 5 **Macfarlane, G.S.**, Redelfs, A.H., & Spruance, L.A. 2021. *Equitable Access to Nutrition in Utah*. \$70,000, Utah Department of Transportation.
- 4 **Macfarlane, G.S.** 2020. *Identifying Microtransit Service Areas through Microsimulation*. \$20,000, Utah Department of Transportation

- 3 **Macfarlane, G.S.** 2019. *A synthesis of passive third-party datasets used for transportation planning.* \$25,000, Utah Department of Transportation
- 2 **Macfarlane, G.S.** 2019. *Modeling the demand and operating characteristics for wheelchair-accessible, on-demand mobility services.* \$60,000, Utah Department of Transportation
- 1 **Macfarlane, G.S.** 2019. *Evaluating the Systemic Redundancy of Critical Highway Facilities.* \$60,000, Utah Department of Transportation

As Co-Principal Investigator, totalling \$1.16 million (\$235,000 to BYU):

- 4 Schultz, G.G. & **Macfarlane, G.S.** 2021. *Analysis of performance measures of UDOT's traffic incident management program: Phase III.* \$30,000. Utah Department of Transportation.
- 3 Watkins, K.E. (PI), Hunter, M.S., Van Hentenryck, P., Peeta, S., Brakewood, C., Cherry, C., Erhardt, G.D., & **Macfarlane, G.S.** 2020. *T-SCORE: Transit Serving Communities Optimally, Responsibly, and Efficiently.* \$1,000,000, United States Department of Transportation.
- 2 Schultz, G.G. (PI), **Macfarlane, G.S.** 2020. *Evaluating Signal Performance Measures: a Longitudinal Analysis.* \$70,000, Utah Department of Transportation
- 1 Schultz, G.G. (PI), **Macfarlane, G.S.** 2019. *Evaluating ramp meter delay in Utah.* \$65,000, Utah Department of Transportation

No unfunded proposals.

#### INTERNAL COMPETITIVE FUNDING

Funded research:

- **Macfarlane, G.S.**, Guthrie, W.S., Mazzeo, B. 2021. *Measuring pavement smoothness from the perspective of e-scooters.* \$25,000, Mentored Research Grant, Brigham Young University.

Unfunded proposals:

- **Macfarlane, G.S.**, Hooley, C., Redelfs, A., South, M. 2020 *Using Mobile Device Data to Measure Isolation and Mental Health.* \$40,000, Brigham Young University Interdisciplinary Research Grant.

#### COURSES

##### CCE 201: SUSTAINABLE INFRASTRUCTURE

The inter-related aspects of the different civil engineering disciplines of environmental, geotechnical, structural, transportation, and water resources and how they come together to develop an infrastructure system. Time value of money and application to the infrastructure investment alternatives.

Semester	Enrolled	Student Rating (Historical)	Average GPA
Fall 2020	33	4.1 - 4.7 (4.1)	3.41
Fall 2021	64	4.1 - 4.5 (4.3)	3.25

Selected student comments:

- Early in the course, Dr. Macfarlane made it clear, without really ever having to say so, that he cares about his students, wants us to think critically and ask questions, that he's really approachable and welcomes feedback. Overall shows high respect and high but reasonable expectations for students.

- Professor Macfarlane was always very respectful to students in the class. He was always willing to answer students questions or spend some time to further explain a concept. He was always very patient and came to class every day with a positive attitude and excited for class.
- thought he always did a good job explaining concepts in class and I thought it was very helpful to have the class notes website because it made reviewing a lot easier.
- I see the world a lot differently now. Different facets of sustainability are so intertwined and there's so much to consider. I feel so much more capable of making important decisions, but also more inclined to look for more perspectives.
- He was super open to questions, very responsive to emails, and if you asked a question and he thought of something more to add later, he'd make sure to reach out to discuss your question further. He's probably my favorite teacher this semester simply because he makes it very obvious in his actions that he wants us to succeed.

#### CE 361: INTRODUCTION TO TRANSPORTATION ENGINEERING

Transportation systems characteristics, traffic engineering and operations, transportation planning, geometric design, pavement design, transportation safety, freight, public transport, sustainable transportation.

Semester	Enrolled	Student Rating (Historical)	Average GPA
Winter 2020	42	4.4 - 4.8 (4.4)	3.13
Winter 2021	38	4.1 - 4.7 (4.4)	3.21

Selected student comments:

- I appreciated that he changed up the class significantly in response to midterm ratings. it would have been very easy to keep going with the material he was given, but he really made it his own and made the class so much better as a result.
- Just like the best BYU professors are. Respectful and caring about his students.
- He has by far been my best teacher in this whole transition to online classes situation.
- This class reinforced to me that I want to end up in the public sector of transportation engineering/planning/public works. I want to work in and with local governments to solve problems for people around me.
- He would take extra care to make sure that we understood the material that we were learning. Dr. Macfarlane cares a lot about his students and wants to help them in any way that he can so he takes time in lecture to answer questions.
- Dr. Macfarlane always seemed to have a really good understanding of the bigger picture and shared it with us, about how different facets of systems work together to make our infrastructure work great to serve people, or sometimes the opposite.

#### CE 565: URBAN TRANSPORTATION PLANNING

Characteristics of urban transportation planning and decision making, intermodal transportation, land-use transportation interrelationships, transportation demand modeling, site impact analysis, sustainable transportation, and livable cities.

Semester	Enrolled	Student Rating (Historical)	Average GPA
Fall 2019	12	3.9 - 4.9 (4.4)	3.41
Fall 2020	19	4.1 - 4.7 (4.4)	3.46
Fall 2021	19	3.9 - 4.9 (4.4)	3.63

Selected student comments:

- I'm still amazed at his quickness in responding to Slack messages, no matter the time of day! Dr. Macfarlane is one of the most kind professors I've had, he's extremely willing to work with you until you understand the concept that he's teaching you.
- The class was organized to teach us theory by allowing us to see it in action through models, which I think helped solidify those concepts.
- I appreciated the discussions on ethics and applying them to our work - few of my classes have mentioned them more than once in a semester, and rarely with applicable concerns.
- I have more of a desire to be involved in the planning process in the future communities that I'll live in.
- Dr. Macfarlane is the reason that I didn't change majors. CE 361 was my favorite fundamentals of engineering course and made me want to become an engineer. CE 565 (this course) has been my favorite course at BYU. Dr. Macfarlane knows his stuff and does a good job of teaching in an interesting and engaging way.

#### CE 594R: DATA SCIENCE FOR ENGINEERS

A first-semester graduate course in programming and data science techniques: literate programming in Markdown and LaTeX, version control with git, data manipulation and visualization with R, object-oriented programming with Java.

Semester	Enrolled	Student Rating (Historical)	Average GPA
Fall 2019	4	4.8 - 5.0 ()	3.85
Fall 2020	9	3.5 - 4.7 ()	3.81
Fall 2021	6	4.5 - 5.0 ()	3.68

Selected student comments:

- I know you didn't have to teach this course, but I appreciate you doing it. When I signed up for the course, I thought I would learn about data science techniques (as what I should look for in analyzing data—types of tests to perform, processes, etc). I think that could be a good edition that could come from Dr. Macfarlane, is teaching more about data science and what that entails, rather than just use R to solve problems.
- I felt like he was pretty good at responding to emails and being merciful and helpful and understanding. He definitely recognized that this semester was different and was flexible.
- I really appreciated Dr. Macfarlane and he did curate some great resources for us to use. He was willing and available to help. And he was flexible and merciful in the midst of a challenging and different semester.
- Almost every class period something that Dr. Macfarlane taught blew my mind! This was an excellent course and much needed to round out my engineering education.

#### CE 662: TRANSPORT SIMULATION AND ANALYSIS

An advanced graduate course in traffic flow theory and simulation. Topics include shock wave analysis, discrete event simulation of queues and daily activity pattern choices, car following models, and traffic simulation. Laboratory assignments use MATSim and PTV Vissim simulation softwares.

Semester	Enrolled	Student Rating (Historical)	Average GPA
Winter 2019	2	4.6 (4.3)	3.70
Winter 2020	3	5.0 - 5.0 (4.4)	3.00

Selected student comments:

- Dr. Macfarlane is really patient in explaining the challenging concepts, and he will find the simple way to describe or teach twice to make sure we totally understand.
- Always came well prepared to lectures. It was obvious that he had put time, thought, and effort into preparing an engaging and effective lecture, every time.
- The instructor expected us to use critical thinking and to not just go for the "right" answer without thought about it. I think this is a valuable way of building students' character.
- The course was well organized because it was clearly explained how new material builds from the previous subject. It was easy to see the progression of how each lecture builds from the last and prepares you for the next.

#### CE 694R: ADVANCED CHOICE MODELING

An advanced graduate course in discrete choice modeling. Theory of choice models, including estimation and validation techniques. Mode choice models for work and non-work trip purposes using multinomial and nested logit models.

Semester	Enrolled	Student Rating (Historical)	Average GPA
Winter 2021	5	4.0 - 5.0 ()	3.48

#### GRADUATE MENTORING

Students mentored as graduate committee chair (6 total, 4 current):

- 6 Gillian Martin Riches. MS scheduled December 2022.
- 5 Christopher Day. MS scheduled December 2022.
- 4 Emma Stucki. MS scheduled December 2022.
- 3 Natalie Gray. MS scheduled December 2022.
- 2 Max Barnes, *Resiliency of utah's road network: a logit-based approach*. MS granted December 2021.
- 1 Nate Lant, *Estimation and simulation of daily activity patterns for individuals using wheelchairs*. MS granted June 2021.

Students mentored as graduate committee member (11 total, 4 current, 2 non-BYU):

- 11 Tomas Barriga. MS scheduled December 2022.
- 10 Tanner Daines. MS scheduled April 2022.
- 9 Samantha Lau. MS scheduled April 2022.
- 8 Wang Bangyu (Bruce). Ph.D. proposed May 2021.
- 7 Logan Bennett, *Analysis of benefits of an expansion to UDOT's incident management program*. MS granted August 2021.

- 6 Camille Lunt, *Crash analysis methodology for segments of Utah highway*. MS granted April 2021.
  - 5 Chad Vickery, *Quantifying the conditioning period for geogrid-reinforced aggregate base materials through cyclic loading*. MS granted August 2020.
  - 4 Michael Sheffield, *Impacts of changing the transit signal priority requesting threshold on bus performance and general traffic: a sensitivity analysis*. MS granted June 2020.
  - 3 Michael Adamson, *An analysis of decision boundaries for left-turn treatments*. MS granted April 2019.
  - 2 Nico Boyd, *Accessibility to urban parks and health outcomes on the neighborhood level*. MS granted August 2018 (at Georgia Tech).
  - 1 Zhang Bingling, *Friendship influences on air travel: a social autoregressive analysis*. MS granted August 2014 (at Georgia Tech).
- 

UNDERGRADUATE  
MENTORING

Students mentored on funded research projects (20 total):

- 20 Dylan Apelu, undergraduate research assistant in e-scooters and pavements (2021 - ).
- 19 Hayden Atchley, undergraduate research assistant in demand microsimulation (2020 - )
- 18 Nicole Adams, undergraduate research assistant in e-scooters and pavements (2021 - ).
- 17 Liv Neeley, undergraduate research assistant in e-scooters and pavements (2021 - ).
- 16 Kaeli Monahan, undergraduate research assistant in community resources and passive data (2020 - ).
- 15 Shannon Anderson, undergraduate research assistant in V2X data, jointly mentored with Grant Schultz (2020 - ).
- 14 Corey Ward, undergraduate research assistant in ramp meter evaluation, jointly mentored with Grant Schultz (2020 - ).
- 13 Michael Copley, undergraduate research assistant in third-party passive data (2018 - 2021). Now MS student at University of Illinois.
- 12 James Umphress, undergraduate research assistant in ramp meters (2020-2021), jointly mentored with Grant Schultz. Now MS student at Oregon State University.
- 11 Christopher Day, undergraduate research assistant in demand microsimulation (2020 - 2021). Now MS student at BYU.
- 10 Emma Stucki, undergraduate research assistant in community resources (2020 - 2021). Now MS student at BYU.

- 9 Gillian Martin Riches, undergraduate research assistant in community resources (2020 - 2021). Now MS student at BYU.
- 8 Natalie Gray, undergraduate research assistant in network resiliency (2019 - 2021). Now MS student at BYU.
- 7 Max Barnes, undergraduate research assistant in network resiliency (2019 - 2020). Now working as an engineering consultant, after completing MS at BYU.
- 6 Kim Munseok, undergraduate research assistant in demand microsimulation (2020 - 2021). Now BS student in computer science at BYU.
- 5 Christian Hunter, undergraduate research assistant in demand microsimulation (2018 - 2019). Now MS student at University of Texas at Austin.
- 4 Christian Vanderhoeven, undergraduate research assistant in demand microsimulation (2019). Now MS student at University of Washington.
- 3 Hayden Anderson, undergraduate research assistant in e-scooters (2019 - 2020). Now MS student at the University of California, Davis.
- 2 Emily Andrus, undergraduate research assistant in signal performance data, jointly mentored with Grant Schultz (2019). Now working as an engineering consultant.
- 1 Sabrina McCuen, undergraduate research assistant in signal performance data, jointly mentored with Grant Schultz (2019 - 2020). Now working as an engineering consultant.

Students mentored as civil engineering capstone team advisor (15 total):

- 2021-2022 Carbon footprint of daily commuting to BYU campus. Sponsored by BYU Sustainability Office. Students: Nicole Adams, Hayden Atchley, Kyle Leatham, and Daniel Jarvis.
- 2020-2021 Forecasting demand for future FrontRunner scenarios. Sponsored by Utah Transit Authority. Students: Gillian Martin Riches, Tomas Barriga, Landon Pratt, and Cole Larsen.
- 2019-2020 UTA microtransit pilot evaluation. Sponsored by Utah Transit Authority. Students: Christian Hunter, Austin Martinez, and Elizabeth Smith.
- 2018-2019 Demand for wheelchair-accessible vehicles. Sponsored by Utah Transit Authority. Students: Nate Lant, Byron Yates, Cody Irons, and Matthew Strong.

## AWARDS AND HONORS

- DWIGHT DAVID EISENHOWER GRADUATE FELLOWSHIP Full doctoral funding from the Federal Highways Administration 2011-2013, one of five awards nationally. Awarded supplemental grant in 2013.
- ENO CENTER FOR TRANSPORTATION LEADERSHIP DEVELOPMENT CONFERENCE Participated in the 2012 program; nominated by the Ivan Allen, Jr. College of Liberal Arts at Georgia Tech.
- PARSONS BRINCKERHOFF - JIM LAMMIE ENGINEERING SCHOLARSHIP Awarded to the top engineer in the 2011 American Public Transportation Foundation (APTF) competition. Sponsored by Mike Allegra, general manager of the Utah Transit Authority. Renewed in 2012.
- GORDON W. SCHULTZ GRADUATE FELLOWSHIP Given to the Georgia Tech student in travel demand modeling who exhibits innovation, problem-solving, and practical application.

NATIONAL SCIENCE FOUNDATION GRADUATE FELLOWSHIP PROGRAM Honorable Mention in 2011 and 2012, as a first- and second-year graduate student.

JIM MCGEE MEMORIAL SCHOLARSHIP Cash award from the Georgia chapter of the American Society of Highway Engineers, one of two awards in 2011.

GEORGIA DEPARTMENT OF TRANSPORTATION SCHOLARSHIP One of ten cash awards in 2010 to students from the southeastern United States.

OFFICE OF RESEARCH AND CREATIVE ACTIVITIES (ORCA) GRANT Competitive research grant to survey Chinese transportation planning practices, one of several undergraduate research awards from Brigham Young University.

FREEMAN-ASIA AWARD Grant to study Chinese finance and globalized engineering at Nanjing University in the People's Republic of China from the Institute for International Education.

---

EXTERNAL  
CITIZENSHIP

Registered professional engineer in North Carolina, license #044518

Transportation Research Board of the National Academies of Science:

- AEP50: Travel Demand Forecasting Member of the committee (2019 — ) on travel demand forecasting. Chair of the travel forecasting resources subcommittee and editor of [tfresource.org](http://tfresource.org).
- AMS20: Economics and Land Development Member of the committee (2014 — ). formerly standing committee on transportation and land use.
- Young Members Council (2019 — 2021). Planning and Environment subcommittee chair.

Reviewer for the following journals:

- Transportation Research Part A: Policy and Practice
- Transportation Research Record
- Environment and Planning B: Urban Analytics and City Science
- International Journal of Sustainable Transport
- Journal of Public Transportation

Member of the following professional organizations:

- Zephyr Foundation (2020 - ).
- Institute of Transportation Engineers (2009-2013, 2018-2020)
- Tau Beta Pi (Utah  $\beta$  '09).
- Young Professionals in Transportation (2013-2018); organizing co-chair of Triangle NC chapter.
- American Public Transportation Association scholar task force (2011 - 2013).
